

GRADUATE ATTRIBUTES

The Sri Venkateshwaraa Medical College Hospital and Research Centre defines the philosophy underpinning its teaching programs through the graduate attributes. These describe the qualities, knowledge and capabilities that students are encouraged to take responsibility for developing throughout their studies at the medical college.

The graduate attributes are not a list of skills to be mastered; rather, they encapsulate for both students and the wider community the defining characteristics of a student's university degree program(s), and describe a set of characteristics that are designed to be transferable beyond the particular disciplinary context in which they have been developed.

Graduate attributes

ATTRIBUTE 1: Core Theoretical knowledge and practical approach

- Deep subject knowledge with practical approach as per MCI medical graduate attributes in MCI website

ATTRIBUTE 2: Creative thinking and Problem solving approach

- Foundation course in 1st year MBBS
- Regular quiz competition (inter and intra medical college level)
- CME and conferences every week for medical students

ATTRIBUTE 3: Physical Fitness and Mental health

- Every year Intra college sports and cultural meet (AGON) in the institution for MBBS students
- Inter college sports meet every 2 yrs (ADRENA)
- YOGA class for MBBS students

ATTRIBUTE 4: Team work and Communication skill

- Educate and demonstrate students the importance of team work in treating patients exemplifying the inter department procedures in our hospital (medical, paramedical, non medical man power)

ATTRIBUTE 5: Attitude, Ethics & Communication

Complete knowledge regarding the Attitude and way of Communication, Ethical values to be followed while treating patients will be taught to students according to the MCI AETCOM

ATTRIBUTE 6: Digital Capability

Recent digital advances in medical science and knowledge about usage of digital medical equipments and digital data transfer will be taught in internship.
