Communication and Language skills module was introduced to the students. Classes were conducted to teach local language. The instructors held interactive sessions with students to teach them vocabulary and correct pronunciations of word and sentences used in day to day in addition of those used during history taking and medical examination of a patient. Further they were shown videos on healthy patient-doctor interaction with the objective of helping them learn the appropriate language, expression, body language and caring touch to be employed while treating the patient. Basic Research skills for medical students were also taken.
