

PROCEDURE IMAGES:

 A lateral X-ray of the cervical spine showing a surgical approach for a discectomy and fusion at the C5-C6 level. A black rectangular marker is visible at the top of the image.	 Two X-ray images of a posterior spinal fusion. The left image is an AP view showing pedicle screws and a cage at the L4-L5 level. The right image is a lateral view showing the same hardware. Text at the bottom reads: "SUBRAMANI - 38/M 2504240915 M TH-LW SPINE AP 25-Jun-25 11:28 AM SVMCH & RC".
Anterior Cervical Discectomy and Fusion	Posterior Spinal Fusion
 An AP X-ray of the pelvis and hips showing a total hip replacement on the right side. The femoral head and acetabular cup are clearly visible. A small 'L' marker is present in the upper right corner.	 Two X-ray images of a total knee replacement. The left image is an AP view showing the femoral and tibial components. The right image is a lateral view showing the patellar component and the joint space.
Total Hip Replacement	Total Knee Replacement
 An arthroscopic image showing the interior of a knee joint. A surgical instrument is visible, and the ACL graft is being reconstructed. The text "B-SURG FHD - MOBILE ENDOSCOPY UNIT" is visible at the top of the image.	
Arthroscopy ACL Reconstruction
